

Online Banking Customers:

We recently completed an upgrade and have identified the following issues:

When logging in from a desktop computer, you will need to enter your user name and password twice in order to gain access to your accounts. Upon entering your password the first time, you will receive an error message and will need to enter your user name and password again. Upon entering the information a second time, you will gain access to the online banking system.

The second issue involves bill payment. Currently, users are unable to schedule payment for the current and next day from the Bill Pay page. In order to schedule payments for the current and next day, click on Options on the Bill Payment page, then click Visit Bill Pay Site. Another window will open allowing you to schedule payments for any day.
